PROFILE

A qualified and result-oriented Software Engineer with over 13+ years of experience in Python Automation and development. Skilled in CI/CD processes, source code management, and Infrastructure as Code (IaC) tools like Ansible, with a focus on building, deploying, and managing code efficiently. Experience in Quality assurance and delivering quality softwares with automated software release pipelines.

SKILLS

Core Technologies

Python, Infrastructure Automation, DevOps

Version Control

Github, Gitlab

Infrastructure as Code (IaC)

Ansible, Terraform, pyvmomi

Security

Sonarqube, Bandit

Software Engineering

Agile, Debugging, Test-driven development, Object-oriented design, Testing Framework Development, Performance Testing, CICD, Release Process, Documentation, Quality Assurance

Soft Skills

Mentoring, Collaboration, Communication, Problem Solving, Adaptability, Time Management, Creativity, Teamwork

Frameworks and libraries

Pytest, Unittest, paramiko, requests, pyvmomi, Fastapi, Elasticsearch

Containerization

Docker, Kubernetes

Cloud & Virtualization

AWS, ESXi, vSAN, vSphere

Operating Systems

Windows, Linux

Editors

Pycharm, VI Editor

PROFESSIONAL EXPERIENCE

Software System Senior Engineer

Dell Technologies

01/2022 – Present

Pune, India

- Developed and maintained the framework using python for different automation teams across BU.
- Streamlined CICD processes and significantly reducing deployment times through automation and pipeline optimization.
- Developed branching strategy for team by creating CICD pipeline which was running checkers like flake8, format, unittests, blackduck, checkmarx, sonarqube, code coverage before code merge.
- Automated provisioning of vmware stamp with zero touch.
- Added automated validation testcases in order to ensure quality of software.
- Created detailed documentation using mkdocs.
- Released pypi packages of SDK in Artifactory.

Senior Software Engineer

EnterpriseDB

09/2018 – 05/2021

Pune, India

- Functional and regression testing of Failover management Software.
- Automate functional testing using python's docker SDK.
- Automate release cycle using jenkins pipelines.
- Monitor jenkins jobs and debug root cause of failure and communicate it to development team.

Principal Automation Engineer*Calsoft*

03/2016 – 09/2018

Pune, India

- Automated vmware stack which had components like ESXi, vSAN, vSphere using REST APIs, pythons ssh libraries and pyvmomi APIs.
- Responsible for logging and resolving bugs in automation code.
- Automated infrastructure deployment in Azure using CLI.
- Configure azure resources using automation.
- Used tools like flake8, black to write cleaner and readable code.
- Worked on creation of Requirement documents, test plan, test cases, release documents.

Senior Software Engineer*Capgemini*

09/2012 – 02/2016

Mumbai, India

- Automated deployment of Openstack components using python.
- Automated failover scenarios for HP's storage product.

EDUCATION

B.E. (Computer)*Pune University*

2007 – 2011

Lonavala, India

12th*Pune University*

2006 – 2007

Nashik, India

10th*Pune University*
